Commissioner Banks Lies to the Governor?

Four months before the commissioner cast a vote to move Clermont's library, the commissioner signed a letter to the Governor describing the exact location of the library to be in Clermont. You can view the letter by clicking [here](#).

This has become typical behavior. First he [voted](#) for a [GEFA loan](#) on a sewer line that contained a sewer rate structure, and then [voted](#) against the sewer rates. Now he has casts a [vote](#) (without making a comment) to move the library after he signed a [letter](#) to Gov. Sonny Purdue indicating that the library would be in Clermont.

What can we make of this? Perhaps he doesn't read what he signs. Perhaps he doesn't read what he votes on. His ad on Access North Ga says that "when his fellow commissioners are wrong, he is the conservative opponent"; but when he has the opportunity to [vote](#) on things that will bring out the [unethical behavior](#), the commissioner sides with the Chairman.

I am beginning to believe that the commissioner is nothing but hot air. Are you starting to believe it to? If so, we need to get him out of office. Vote for Lutz on August 10th!
